Weld Cleaner

SolidClean Serie

Orbitalservice introduces its Modern multivoltage full inverter technology

Efficient and energy efficient cleaning of stainless steel/inox welds

Patent application on unique technical design

The latest industrial welding seam cleaners

Unlike "toroidal transformer models," the SolidClean® weld seam cleaner is a unique multivoltage full-inverter technology for which a patent is pending.

The energy consumption is significantly lower than with conventional models while the 100% duty cycle is combined with a high power output up to even 2.5 kW.

The solid design and first-class components make the SolidClean® ideally suited for long-term use under the most demanding conditions.

High performance carbon brushes

For professional cleaning of stainless steel/inox weld seams and surfaces Orbitalservice offers premium carbon brushes that can be used for a long time.

Weld Cleaner

SolidClean® Serie

Highly dosed liquids

The Cleaner, Polisher and Neutralizer have a dosage of phosphoric acid and are therefore extremely efficient. The phosphoric acid is food grade and contains absolutely no nitric acid. The liquids are available in 1L and 5L packaging

Three models available

SolidClean® 80
1.200 Watt - full inverter

1 - 12 Volt, adjustable
** accurately $\pm 0,5\%$

0 - 80 Amps, adjustable
*** AC-DC switchable
with AC balance adjustment

SolidClean® 100
2.000 Watt - full inverter

1 - 24 Volt, adjustable
** accurately $\pm 0,5\%$

0 - 100 Amps, adjustable
*** AC-DC switchable
with AC balance adjustment

SolidClean® 150
2.500 Watt - full inverter

1 - 30 Volt, adjustable
** accurately $\pm 0,5\%$

0 - 150 Amps, adjustable
*** AC-DC switchable
with AC balance adjustment

**WITH AUTOMATIC
LIQUID FEEDING**
